

MODIFY REPORTS

Modify a Report's Criteria

You can change reports that don't quite meet your needs. For example, you might use a report that finds your patients with diabetes and high HbA1c results. You can change the report to find all patients with diabetes and high HbA1c results who were seen in your primary department and then save a new version of the report.

You can change reports that don't quite meet your needs. For example, you might use a report that finds your patients with diabetes and high HbA1c results. You can change the report to find all patients with diabetes and high HbA1c results who were seen in your primary department and then save a new version of the report.

1. From the Catalog, hover over a report and click  in the upper-right.
2. On the Criteria tab, use the pencil to change the search value or logic for any criterion.
3. Click the trash can to remove a criterion
 - a. If you don't see this icon, the criterion is required.
4. Click **Save As** if you want to create a new version of the report, and then click **Run**.

Add Criteria to a Report's Search

Criteria determine what a report searches for and help you target specific patients in your results. The criteria available vary by report.

1. In the Catalog, hover over a report and click  in the upper-right.
2. On the Criteria tab, search for a criterion to include in the report
 - a. Enter a keyword or click **Search** to see all criteria.
3. Beneath your newly added criterion, enter what values the report should find
 - a. The available options depend on the criterion you selected.
4. To change the logic between values in a criterion, click **OR**, **AND**, or **Custom** next to the criterion
 - a. The button name depends on the logic the criterion is currently using.
5. Click **Save As** if you want to create a new version of the report, and then click **Run**.

Change a Report's Search Time Frame

In some reports, you can set a date range to control the time frame the report searches. The date range applies only to criteria that change over time (these criteria are identified by this  icon).

For example, if you're searching for your male patients between January 1 and March 1, the date range is ignored because a patient's sex rarely changes. All of your patients appear in the results. If you add the criterion BMI > 30, the report uses the date range because BMI can change over time. The search results include only male patients that had a BMI greater than 30 between January 1 and March 1.

1. From the Catalog, hover over a report and click  in the upper right.
2. Click the pencil to specify the date range and, in certain reports, the time range.
3. Enter a relative date using one of the following shortcuts

- a. w=week
 - b. m=month
 - c. mb=beginning of the month
 - d. me=end of the month
 - e. y=year
 - f. You can also use an absolute date.
 - g. For example, enter "mb-3" to search for patients whose BMI was greater than 30 in the past three full months.
4. Click **Save As** if you want to save a new version of the report, and then click **Run**.

Remove Deceased Patients from a Report's Results

1. From the Catalog, hover over a report and click  in the upper-right.
2. Search for the **Patient Living Status** criteria.
3. In the **Living Status** field, select a value of Alive.
4. Click **Save As** if you want to create a new version of the report, and then click **Run**.

Add a Column to a Report's Results to Show Additional Data

1. In the Catalog, hover over a report and click  in the upper right.
2. Select the **Display** tab.
 - a. All of the columns available for the report appear in the **Available Columns** list.
 - b. All of the columns that currently appear in the report are in the **Selected Columns** list.
3. Select a column from the **Available Columns** list
4. Click the right arrow to move it to the **Selected Columns** list.
5. Click **Save As** if you want to create a new version of the report, and then run the report.

Remove a Column From a Report's Results

1. From the Catalog, hover over a report and click  in the upper right.
2. Select the **Display** tab
 - a. All the columns that currently appear in the report are in the **Selected Columns** list.
3. Select a column from the **Selected Columns** list and click the left arrow.
4. Click **Save As** if you want to create a new version of the report, and then click **Run**.

Keep Columns in the Same Place

You can prevent Reporting Workbench columns from moving when you scroll by anchoring them in place in Report Settings.

1. From the Catalog, hover over a report and click  in the upper-right.
2. On the **Display** tab, change the number of columns anchored using the dropdown **Anchor** menu.
3. Move the colored Anchor divider in the Selected Columns list using the ▲ and ▼ arrows so that the columns you want anchored are above the divider.
4. Click **Save** to save the new anchor settings, and then click **Run**.

Change the Order of the Columns in a Report's Results

1. From the Catalog, hover over a report and click  in the upper-right.
2. Select the **Display** tab and the column you want to move in the Selected Columns list.
3. Click  or  to move the column up or down
 - a. The first column in the list is the leftmost column in the report's results.
4. Click **Save As** if you want to create a new version of the report, and then click **Run**.

Change the Width of a Column in a Report's Results

1. From the Catalog, hover over a report and click  in the upper-right.
2. Select the **Display** tab and double click a column in the Selected Columns list.
3. Enter the column width you want to use and click **Accept**.
 - a. Column width is measured in twips
 - b. To figure out how many twips to enter, compare the width of the column you want to change to the width of other columns.
4. Click **Save As** if you want to create a new version of the report, and then click **Run**.

Change the Color and Font in a Report's Results

1. From the Catalog, hover over a report and click  in the upper-right.
2. On the Appearance tab, select Set custom colors.
 - a. Indicate whether you want to set the colors and fonts by rows or columns.
 - b. For each row or column you want to change, click in the associated field to change the text color, background color, or font type and size
 - c. Your changes appear in the preview below.
3. Click **Save As** if you want to create a new version of the report, and then click **Run**.

Call Attention to Specific Values in a Report's Results

You can change a report's display so specific values in the results stand out. For example, when running a report to see all diabetic patients' recent A1C levels, you can have any level above 7 (abnormal) appear with a red background so you can quickly identify patients to check on.

From the Catalog, hover over a report and click  in the upper-right.

On the **Appearance** tab, under Conditional Formatting, click **Add Rule**.

Choose to apply your formatting to a single cell or the entire result row.

Set when this formatting should appear:

- a. In the **Column** field, select the column that contains the values you want to call out.
- b. Enter the logic you want to use in the **Operator** field.
- c. Enter what the system should look for in the **Value** field.

Choose from a Preset formatting option or create Custom formatting.

- i. With custom formatting, you set the font type and size, font color, and cell background color.
- d. A sample visual of your formatting appears to the left.

Accept to save changes.

Click **Save As** if you want to create a new version of the report, and then click **Run**.

Organize action buttons

You can remove and reorder the default buttons that appear on your toolbar.

1. From the Catalog, hover over a report and click  in the upper-right.
2. Select the **Toolbar** tab and use the check boxes to determine which buttons appear for that report.
3. Click the arrows on the right side of the screen to reorder the buttons.
4. Save your changes when finished.

Save a Modified Copy of a Report

If you change a report, you can save a private copy so you don't have to make the changes each time you run the report. The copy of the report is available to view and run only by you.

If the **Save As** button isn't available in Report Settings, you need to change the report each time you want to run it with these settings. If you often make the same changes, ask your reporting team to create a new version of the report.

After you've created your own copy of a standard report, you can continue to change and save that copy. You don't need to keep making new copies of the same standard report.

1. Click **Edit** in the appropriate report and modify the report to meet your needs.
2. On the **General** tab, select **Public** or **Private** to determine who has access to your modified copy.
 - a. If you select Private, the report appears with this  icon in the Library.
3. Save your changes and return to the report.
