

TIP SHEET: FILTERING LOCATIONS

Location Identification

Service Area	all of AdventHealth (except Retail Pharmacy)
Parent Hospital Location	used to group transactions and accounts receivable for hospital billing
Group	multiple locations grouped together
Revenue Location	one address
Department	separate areas at one revenue location
Financial Division and Subdivision	for professional billing, aggregates of revenue bill areas; equivalent of a medical group
Bill Area	for professional billing, aggregate multiple revenue areas across departments and providers; combines specialty and financial division

Search ALN for “GEN606” to watch this helpful E-Learning:

Epic Facility Structure (GEN606)

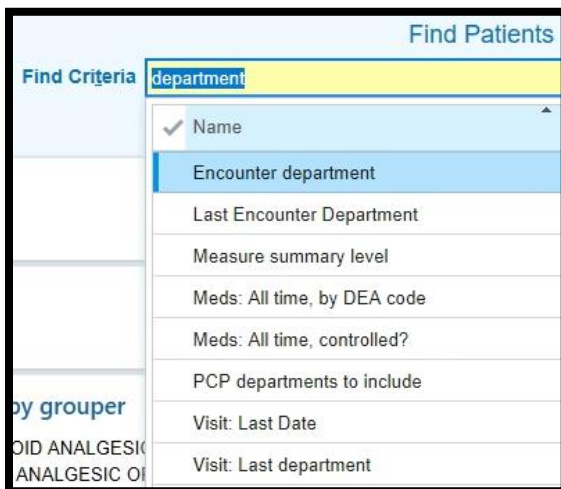

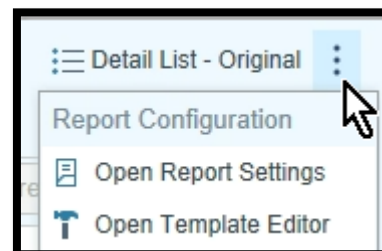

Version: 2021-06

Course (1 class)

Understand how the parts of an organization are defined in Epic.

Reporting Workbench

1. From the Report Viewer Details, click the Options icon
2. Click Open Report Settings
3. Type “department” or “location” in the Find Criteria box and select the appropriate option (the list will vary from template to template)

4. Save As if you want to keep this version of the report to run again
5. Click Run

Selecting your Hospital

You may notice several types of Revenue Locations for hospitals:

- Hospital
- VIR
- Parent Location

Make sure you select the appropriate hospital location for your report. For example, the Location ID for the AdventHealth Altamonte Springs Parent Location is not the same as the Location ID for the AHALT Altamonte Springs Hospital or CM Outpt CFL Division VIR.

Patient's primary location

AHALT ALTAMONTE SPRINGS HOSPITAL OR

CM OUTPT CFL DIVISION VIR OR

ADVENTHEALTH ALTAMONTE SPRINGS PARENT LOCATION

3 different location IDs

SlicerDicer

Data models and most sessions include all of AdventHealth Service Areas by default. You can filter locations one of two ways:

- Use the **Browse** button or search bar to add a location filter to your Population.
 - Click the **+ Browse** icon to use categories to select your preferred location filter
 - Add your location or department name in the search bar for quick selection.
 - Some data models include base filters which allow location selection.
- Use **Slices** to group by location
 - Click the **+** icon next to Slices
 - search for location keywords
 - use folders to select a Facility Structure option
 - Use the search box to make specific selections
 - Use Grab Top or Grab Bottom (up to 100)
 - Drill down into a single location from the graph by double clicking. The choice will be added to your Population filter.

Dashboards

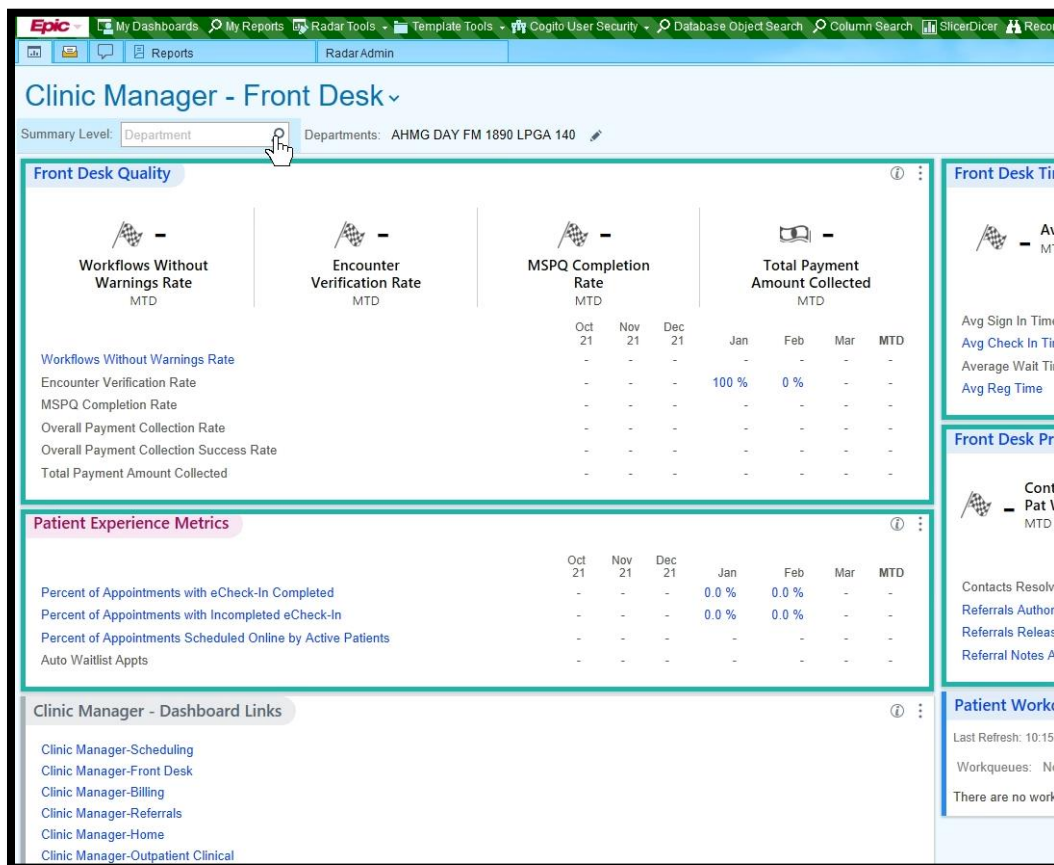

Summary Level

Some dashboards include metric based components which allow you to change the Summary Level using the selection boxes at the top of the dashboard. Options may be limited by your login department or locations listed in your employee security profile.

Default setting matches the login department on this dashboard

Hovering your mouse over the Summary Level will highlight the components affected by this setting.

Change Context

Some dashboards require you to be logged into a specific department in order for your location data to populate. (Example: ES Front Desk Dashboard) If you need to change your login department, you don't have to log out! Simply click on the Epic button and select **Change Context** to select a different department.

If this is something you need to do frequently, you can add the Change Context icon to your toolbar. Simply click the Modify Toolbar icon  at the top right to drag the icon to your toolbar.
